PATIENT INFORMATION

Consumables

To be able to offer all services to our patients we subsequently have to introduce a small fee for Consumables used in the clinic.

It is to help cover the costs of the procedures and the materials we use, which includes but is not limited to instruments, needles/syringes, local anaesthetic/medications, sutures and dressings and sterilisation of instruments.

We hope this helps you understand these fees and we appreciate your ongoing support.

Quality of Care

Your family doctor is a specialist qualified to look after all aspects of the personal health of you and your family. The doctors at Berrigan Family Medical Centre provide you with best possible care by applying those years of experience and training.

Likewise, our practice nurses apply their years of experience and training to ensure you receive a high standard of care. The best relationships thrive on mutual respect and consideration.
